Phone (Office): (847) 229-4716
(Cell): (847) 344-4854

or

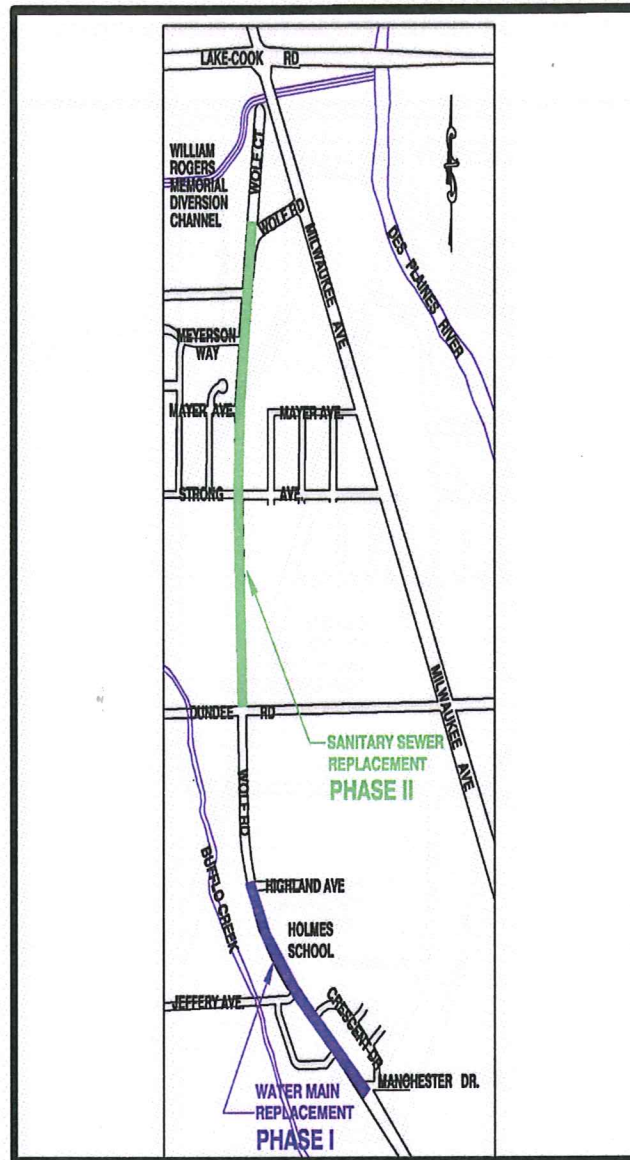

Tim Merrihew
Capital Projects & Design Manager
Phone: (847) 229-4708
or

Anthony Stavros
Director of Public Works
Phone: (847) 229-4717

Contractor

Glenbrook Excavating & Conc. Inc.
1350 N. Old Rand Road
Wauconda, IL 60084
Don Adkin (847) 833-0343
Glen Kirchen (847) 724-9477

Location Map

Wolf Road Sanitary Sewer and Water Main Replacement

Wolf Road Sanitary Sewer and Water Main Replacement

Background

- ◆ Due to current & future developments along Wolf Road, Milwaukee Avenue & Lake-Cook Road, it was found that the existing sanitary sewers are undersized to adequately accommodate flows from future developments; thus this sewer needs to be upgraded.
- ◆ Additionally, some water main work will be done along with the sanitary sewer work. This work will eliminate unnecessary water main crossings of Wolf Road, streamline the system and improve the Village's Wolf Road water main infrastructure by abandoning old 6" cast iron water mains on Wolf Road.

Affected Area

- ◆ Wolf Road between Milwaukee Avenue and Dundee Road for Sanitary Sewer Replacement
- ◆ Wolf Road between Highland Avenue and Manchester Drive for Water Main Replacement.

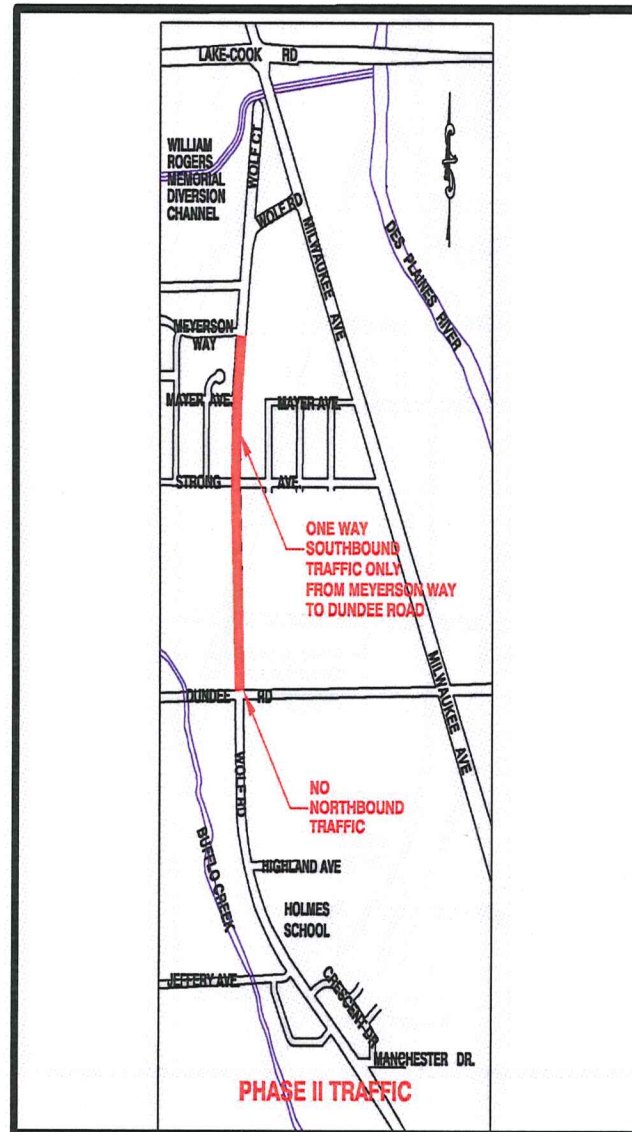

Elements of Work

PHASE I

- ◆ First, traffic control signs will be installed for the water main replacement on south of Dundee Road.
- ◆ Then, the project will begin with the mobilization of equipment and delivery of materials in early March, 2009.
- ◆ Next, Wolf Road south of Dundee Road will be excavated and water main will be constructed.

Traffic During Construction

NO NORTHBOUND TRAFFIC ON WOLF ROAD FROM DUNDEE ROAD TO MEYERSON WAY DURING THE SANITARY SEWER WORK. FOR MORE INFORMATION, PLEASE CHECK <http://www.wheelingil.gov/>

Elements of Work continued

- ◆ Once new water main improvements are installed and trench backfill is completed, restoration of asphalt pavement, concrete sidewalks and curb/gutter will be accomplished.
- ◆ Lastly, ground restoration to include sodding and/or tree replanting will be accomplished and all remaining traffic control will be removed.

PHASE II

- ◆ After the completion of water main replacement, all traffic control signs, i.e., Detour Signs, One Way Signs, Road Closed Signs, and Barricades will be installed for the sanitary sewer replacement beginning early April, 2009.
- ◆ Then, Wolf Road north of Dundee Road will be excavated and sanitary sewer will be replaced as needed.
- ◆ After the sanitary sewer improvements are installed and trench backfill is completed, restoration of asphalt pavement, concrete sidewalks and curb/gutter will be accomplished.
- ◆ Finally, ground restoration will be accomplished and all remaining traffic controls will be removed by early August, 2009.

What to Expect

- ◆ Construction is scheduled to begin in March, 2009 with substantial completion slated for early August, 2009.
- ◆ Daily work hours — Monday through Friday, 7 a.m. to 6:00 p.m.; and 7:00 a.m. to 6 p.m. Saturdays if necessary.
- ◆ Some areas will have open cuts 12 to 15 feet deep. Please avoid the construction zone, if possible.
